WHY CHOOSE US

ABOUT US

What we do

Lunar Solar Consulting is not only a knowledgeable source for solar information, we pride ourselves on ethical home solar consultation. We work with several of the top national solar installation companies to give customers the best possible freedom of choice. We specialize in Solar financing, Leases, and Power Purchase with a system provided. Our favorite way to help customers is through our Solar Tax Maximize Plan, which consistently averages an extra \$7500!!!

Maximize tax rebates

Switching to solar can be a very easy decision when you compare lifetime energy expenses and use our accounting experts to maximize government solar tax rebates up to 70%. Our accounting services understand that most tax preparers miss extra solar incentives and file solar incentives incorrectly. We average an extra \$7500.00 per homeowner, which comes with free audit protection.

Solar Industry

In the last decade home solar installations have exploded, with an average yearly growth rate of 24%. The reason for this is strong government policies such as the Investment Tax Credit, rapidly declining costs and significantly increased consumer demand in both resident homes and commercial. Clean energy now more than ever is here to stay and has a bright future.

Our Partners

We work with multiple large installation companies to make sure you are given the best possible solar solutions. We offer SunPower, Palmetto as well as Sunrun options. Its important to us to provide home solar consultation that is impartial and without fear or favour.
